

**Chemistry-I Assignment**  
**Chemistry-in-the-News**

Name:  
Period:

As part of our introduction to chemistry, each student will be completing a “Chem News” assignment. The specifics are as follows:

- **find an article** from newspaper, magazine or website related to science (and, hopefully, chemistry) that is of interest to you. The article must be **within the last month**. You will record source title and date below.
- **Clip, copy or print off** the article and **attach** it to this sheet
- **Highlight all the vocabulary terms** in your article that you believe are related to science/chemistry
- **Copy the vocab terms** onto the space below **and define those terms** (using the context of the article and/or looking up the terms using a reference source) (note: if there are no “fancy” science terms, it probably is not a good article for this assignment.
- Finally, **write a brief summary** of the article IN YOUR OWN WORDS on the space below.
- Be prepared to **share your article** and summary with the class.
